

Moderating a Web Conference

User management

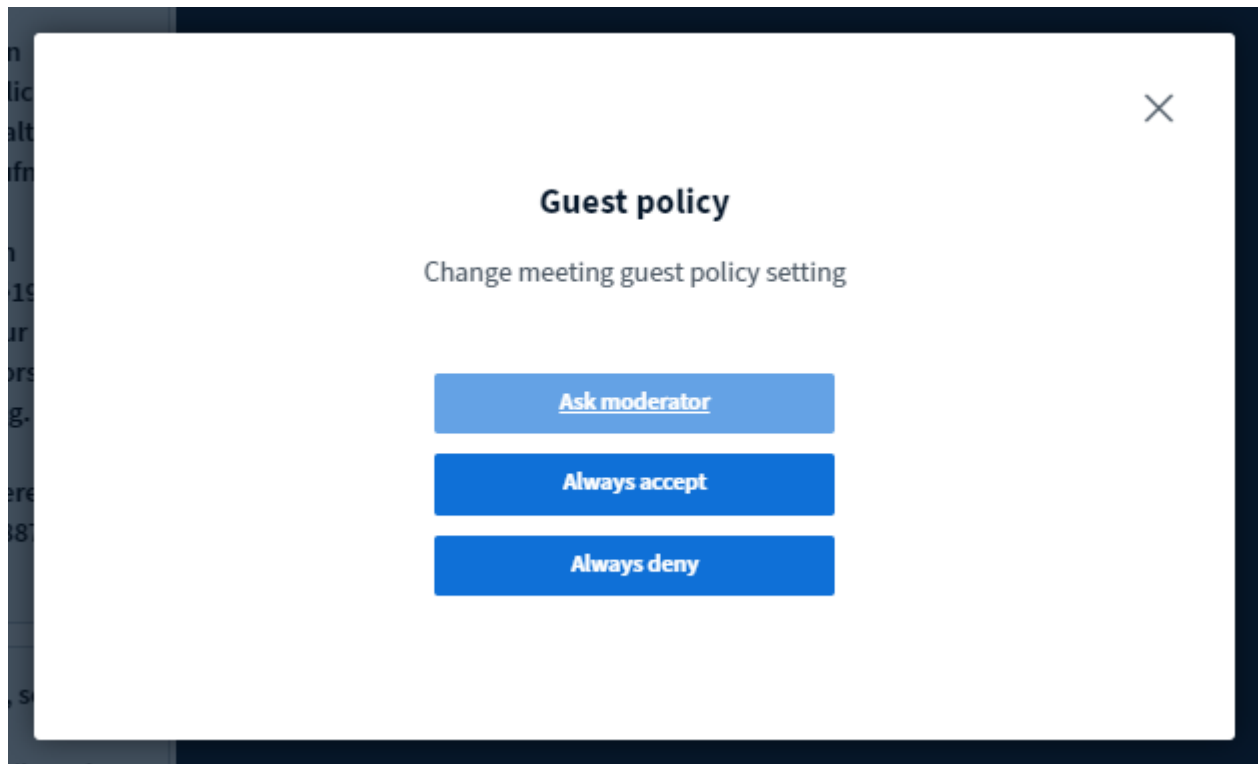

You can manage participants by clicking on the gear icon.

The screenshot shows a web conference interface. On the left is a sidebar with sections: MESSAGES (Public Chat), NOTES (Shared Notes), and USERS (4). The user list includes Jeremias Hübner (You) and three test users. A settings gear icon is visible. The main area is titled 'Public Chat' and contains several text boxes. The top box is a welcome message in German: 'Willkommen in der Sitzung RZ documentation! Hier finden Sie unsere Anleitungen zu diesem Dienst: RZ-Doku Für sämtliche Inhalte der Videokonferenzen gilt das Urheberrechtsgesetz.' Below this is a settings menu with options: Turn off meeting mute, Lock viewers, Guest policy, Save user names, Clear all status icons, Create breakout rooms, and Write closed captions. The bottom box contains meeting instructions: 'To invite someone to the meeting, send them this link: https://webconf.tu-clausthal.de/b/jer-rvj-bv4-xsd Access Code: 105629'.

By selecting „Lock viewers“ you can lock or unlock certain features for all participants. Moderators will not be affected by these settings.

„Guest policy“ allows you to restrict or open access to a room in an ongoing conference. You can choose to set up a waiting room where a moderator admits participants individually, or you can choose to “Always accept” or “Always deny” access to a room. Room access codes remain valid regardless of any settings selected in “Guest policy”. A moderator code grants access even if a room is locked.

If you have restricted access to a room by selecting "Ask moderator", you can admit participants individually as shown below:

← Waiting Users

Message to the guests' lobby

"There is currently no message"

Review Pending Users

Allow all authenticated

Allow all guests

Allow everyone

Deny everyone

Remember choice

3 Pending Users

Te	[1] test-user1	Accept Deny
Te	[2] test-user2	Accept Deny
Te	[3] test-user3	Accept Deny

Breakout rooms

You can select „Create breakout rooms“ if you would like to divide participants into groups for a specified amount of time.

The screenshot shows a web conference interface for TU Clausthal. On the left, there is a sidebar with sections for 'MESSAGES' (Public Chat), 'NOTES' (Shared Notes), and 'USERS (4)' (Jeremias Hübner (You), test-user1, test-user2, test-user3). The main area is titled 'Public Chat' and contains several text boxes. The top box is a welcome message: 'Willkommen in der Sitzung RZ documentation! Hier finden Sie unsere Anleitungen zu diesem Dienst: RZ-Doku Für sämtliche Inhalte der Videokonferenzen gilt das Urheberrechtsgesetz.' Below this is a settings menu with options: 'Turn off meeting mute', 'Lock viewers', 'Guest policy', 'Save user names', 'Clear all status icons', 'Create breakout rooms' (highlighted with a red underline), and 'Write closed captions'. The bottom box contains instructions: 'To invite someone to the meeting, send them this link: https://webconf.tu-clausthal.de/b/jer-rvj-bv4-xsd Access Code: 105629'.

You can assign participants manually or randomly to a group, determine the duration of the breakout rooms and the number of groups (maximum 16).

Breakout Rooms

Create

Tip: You can drag-and-drop a user's name to assign them to a specific breakout room.

Number of rooms

Duration (minutes)

Randomly assign

Allow users to choose a breakout room to join

Not assigned (4)	Room 1	Room 2
Jeremias Hübner (You)		
test-user3		
test-user1		

Once breakout rooms are set up, all selected participants will automatically be invited to join. Participants can then join upon their confirmation. While the audio connection to the main room is lost upon entering a breakout room, the main room remains open and all participants remain connected throughout.

When you click on „Breakout rooms“, all breakout rooms will be displayed. You can then join a specific room, increase the duration of time using the plus symbol, or close all rooms.

The screenshot shows a web conference interface with a sidebar on the left and a main content area on the right. The sidebar includes the TU Clausthal logo, sections for MESSAGES (Public Chat), NOTES (Shared Notes), BREAKOUT ROOMS (Breakout Rooms), and USERS (4). The main content area shows a 'Breakout Rooms' header with a back arrow, followed by two rooms: Room 1 (2) with participants test-user2 and test-user3, and Room 2 (1) with participant test-user1. Each room has 'Ask to join' and 'Join audio' links. At the bottom, there is a 'Duration 14:33' indicator with a plus icon and a blue 'End all breakout rooms' button.

If participants need to be assigned to a room after the breakout rooms have already been created, invitations can be sent by clicking on the gear icon.

The screenshot shows a web conference interface for TU Clausthal. On the left is a sidebar with sections: MESSAGES (Public Chat), NOTES (Shared Notes), BREAKOUT ROOMS (Breakout Rooms), and USERS (4). The users listed are Jeremias Hübner (You), test-user1, test-user2, and test-user3. The main area is titled 'Breakout Rooms' and shows two rooms: Room 1 (2 users: test-user2, test-user3) and Room 2 (1 user: test-user1). A settings menu is open over the users list, with 'Breakout room invitation' highlighted in red. At the bottom, there is a duration indicator 'Duration 13:33' and a blue button labeled 'End all breakout rooms'.

Once breakout rooms are closed either manually or automatically with the expiration of time, all participants are directed back to the main room.
