

# Using eduroam with MacOS X

## Requirements

You have to accept the WiFi Conditions once to use the WiFi.

WiFi Conditions: <https://service.rz.tu-clausthal.de/apps/radius/policy>

## Configuration (MacOS X 10.7 to 10.13)

Please download the newest eduroam profile and start the installation.

Configuration Profile: eduroam

The configuration profile isn't signed for technical reason. You can have a look on the profile to be sure, it will not do anything unexpected.

- Enter your **UserID** and add **@tu-clausthal.de** behind it, so it looks like the following: „mmus17@tu-clausthal.de“. Then enter the belonging password and click on Install.

- After the installation is complete, you'll get a summary of all changes that were taken to your system.

- Eduroam is installed successfully.

## Check the Installation

- In your System Settings below Network / Advanced you can check the tab 802.1x, if the profile „WiFi (eduroam)“ installed correctly.

- Now you should be able to connect to eduroam.

wifi, wlan, MacOS X

[studierende], [mitarbeitende]
